OUR CONTRIBUTION TO THE EFFICIENCY
AND SUSTAINABILITY OF BUILDINGS

MYRTHA POOLS

FOR BREEM[®] CERTIFICATION SCHEME

WHAT IS BREEM[®]

The **BREEM International New Construction** scheme is a performance based assessment method and certification scheme for new buildings.

The primary aim of BREEM International New Construction is to mitigate the life cycle impacts of new buildings on the environment in a robust and cost effective manner. This is achieved through integration and use of the scheme by clients and their project teams at key stages in the design and construction process.

This enables the client, through the BREEM Assessor and the BRE Global certification process, to measure, evaluate and reflect the performance of their new building against best practice in an independent and robust manner.
